We are available to assist anyone that experiences a mental health crisis 24 hours a day, 7 days a week, every day of the year. We provide a wide range of psychiatric services, mental health therapy, case management, peer support, chronic disease management, community living supports, behavioral and opioid health homes, supported employment, and more that are designed to meet the specific needs of each adult or child we serve.

We provide leadership in collaborating with other community organizations and individuals to ensure the best possible services to individuals in need and the best use of community resources. Our staff members are involved in a number of community projects that promote good mental and physical health and wellness. We have staff trained and engaged to provide social support at our public schools, at law enforcement facilities, at hospitals, at senior facilities, at housing and transportation agencies.

We engage individuals in community life when they need assistance to connect with other community members. Convenience, quality care, and affordability are key ingredients in our vision. We are proud of our Board and staff members that are so dedicated to the people that we serve.

Our Services

Centra Wellness Network provides wellness and recovery-oriented services and support for individuals with mental illness and/or intellectual/developmental disabilities, and for children with emotional disturbances. Our purpose is to help qualified individuals of all ages in their pursuit of recovery and wellbeing by removing any barriers encountered in order to achieve good mental health and to fully participate in community life, utilizing all its resources in line with their individual needs, wants, and desires.

Once a person is determined to qualify for Centra Wellness supports and services, the process of getting to the services that meet the purpose described above is called Person Centered Planning (PCP). With assistance of a Centra Wellness Case Manager or Mental Health Clinician, the person wanting services actively participates in the PCP process. All persons can invite their chosen spokesperson to also attend the PCP meeting, if the person so wishes, to ensure that their needs, wants, and desires are addressed in the individual plan of service. Once established, this plan can be amended at any time as the person progresses with meeting their established goals.

The supports and services resulting from this process are provided on an individual basis, regardless of diagnosis, or, if the person chooses, in small groups. The person has the right to choose which staff person they wish to utilize as support staff within reasonable financial and organizational parameters of Centra Wellness Network, including any of our service provider organizations. Within the same parameters, the person also has a right to hire their own support staff with the potential use of a Fiscal Intermediary (a third party that is used to help the person to manage an allotted support budget).

If a person only requires medication management services, it is available by itself without the process described above.

AVAILABLE CLINICAL SERVICES

Centra Wellness Network offers a variety of services designed to meet your needs and honor your choices to attain the goals agreed upon in your person centered plan, the list of services and a brief description are located in the companion guide **Community Mental Health Guide to Services**, provided in this orientation packet and on our website.

When you have realized your goals and are ready to leave our services, we will assist you in creating a **transition plan** that will assure you have needed natural supports in place, connect you with other community services and resources that can benefit you and let you know we are ready to help should you need our services in the future.

TELEMEDICINE SERVICES

Centra Wellness Network has the capability of providing telemedicine services, which are the use of confidential, electronic media to link patients with health care professionals in different locations, audibly and visually. Telemedicine is provided only when you request it and when it is determined that your goals can be adequately accomplished when considering the availability and utilization of technology. You can ask for telemedicine at any point throughout services and your treatment plan will be updated to reflect how telemedicine will be utilized during the provision of services.
